Teams Ignite 2019 announcements

Private channels

Set security at channel level across conversations/files etc. Creates "lightweight" SharePoint site collection per channel, but can be extended

Now

New file experiences

Work with metadata, share, rich previews, see people cards (showing recent files etc.), joined-up activity across Teams/SharePoint

Now

New call capabilities

Emergency calls, queueing, admin controls, call delegation etc.

End 2020

Share e-mail to Teams

Move conversation to Teams from e-mail (and vice-versa - Teams chat to Outlook)

Early 2020

Consolidated tasks in Teams

Shows tasks from Planner, To Do, Outlook and Teams channels.

Early 2020

Whiteboard integration

Including templates for brainstorming, sprint planning and product planning

Now

Polls and surveys

Available in chat or channel conversations

End 2019

Better multi-tasking

Multi-windowing (pop out window to stay in context) and pinned channels for navigation

Early 2020

Better meetings

Defined attendee/presenter controls, live captions (English at first), management of Teams Rooms (config/monitoring of devices etc), new rooms hardware

Various

Yammer app for Teams

Embeds Yammer experience as top-level app, to join inner/outer loops

Early 2020

SMS Sign-In for Firstline Workers

Simple sign-in with phone number and SMS passcode (like Kaizala)

Early 2020

Virtual Consults

Facilitates B2C healthcare consultations, job interviews etc. through browser or mobile app

Preview now

Power Apps integration

Makers can easily publish a Power App to Teams, users can pin to left rail
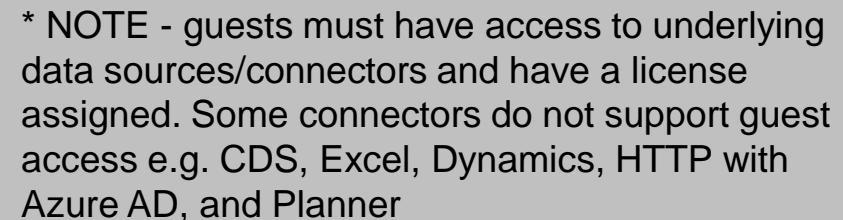

End 2020

Apps enhancements

New app catalog, app policies to drive standardization

Early 2020

SharePoint Ignite 2019 announcements

Feature	Description
Project Cortex/ Knowledge Network	Centred on a Knowledge Center featuring key topics, experts and content within your organization. Generated by AI and curated by humans. **March 2020**
Multi-lingual capabilities	View page content in alternative languages, with translation support for authors (e.g. notifications, highlighted changes in new page version). **Soon**
Fluid Framework	Build experiences to provide simultaneous live updates within Office docs, SharePoint pages, Teams messages and more. **Private preview now**
Teamify	Simpler way to add Team to existing SharePoint site, with auto-creation of tabs for selected lists, libraries and pages. **Now**
Authoring improvements	Small header option, page scheduling, new web parts (e.g. "My feed", Yammer conversations v2), new footer options, in-built images, version diffs etc. **Various**
SharePoint list enhancements	Column/row formatting designer (creates JSON), PowerApps for document libraries, card view designer, connected web parts. **Soon**
Home Sites	Generally available. **Now**
Mobile app updates	Including support for your org branding. **Soon**
Megamenu navigation targeting	Personalized links in header navigation (based on AAD Group membership). **Soon**
New limits	50GB max file size (100GB for OneDrive) and 2m site collections (or Teams) per tenant. **Now to H1 2020**
Differential sync	Now for ALL file types (not just Office). **Now to H1 2020**
Free self-service migration option	Plan and execute a FREE migration from Google Drive, Box, Dropbox, Egnyte and other providers without specialist skills, powered by Mover. **Early 2020**

Roadmaps (selected)

Roadmap: Intelligent intranet

Available soon

Home sites for web and mobile

Hubs
- Hub join approval
- Bulk hub association in admin center (available now)

Make a classic team site a comm site

Site scripts & site designs
- Extract a site to a site script, including multiple lists, branding and navigation (using PowerShell)

Audience targeting for news and pages

Modern page authoring
- Wiki Linking
- Undo/Redo
- Content handler (Available now)

Branding
- Shy header
- Extended footer

Early next year

Page scheduling
Audience targeting for navigation
Multilingual publishing

Hubs
- Associated hubs
- Hub permissions
- Hub analytics

Site scripts & site designs
- Support for folder and file content
- Teams template integration
- Additional script actions

Pages, news and web parts
- Image resizing
- Visual page diffing and version history
- News filtering across sites with managed metadata
- Yammer conversations web part (v2)
- My Feed web part

Branding
- Microsoft Fluent Design Language

File uploads in SP mobile app
Portal owner page

Top of mind

Custom fonts

Global tenant navigation

Further integrations into Microsoft Teams

Calendar experiences in SharePoint

OneDrive Roadmap

Delivered since SPC

File card (time to read, insights)

Comments (non-Office files)

360° image and AutoCAD previewer

Password-protected links

External Sharing Reports

Updated design for iOS app

Updated recent view and UI for PDF annotations

New files experience (Outlook iOS)

Virtual Desktop Support

Per machine install (sync client)

Differential Sync

Direct links to individual PowerPoint slide

Popular Around Me

B2B sync (Sharing now in preview)

Available soon

File card (conversations)

Block download for non-Office files

Request Files

New files experience in Teams

New file sharing experience in Teams

Save for later

Expiring access for external users

@mention email notifications include Office comments

Recommended view on web

OneNote migration via PC folder backup (KFM)

Top of mind @ Ignite

Continuing sharing improvements

Migration with Mover

100 GB file upload size (Rolling out)

Sync health reporting

Add to OneDrive

Microsoft Search roadmap

H2 CY19

New Search Locations
- Windows
- Office Web (Word, Excel, PowerPoint)
- Next version of Microsoft Edge (Public Preview)
- Bing mobile (iOS & Android)
- In-market Edge browser
- Classic SharePoint sites
- Bing Enterprise Homepage (Announce)
- Industry News (Public Preview)

Improved Search Experiences
- Spelling suggestions
- Improved people search relevancy (fuzzy matching, nicknames, natural language)
- Search scoping controls in Modern Document Libraries, Lists for site, hub or the whole company
